the absolute sound

This fully balanced, Class AB amplifier packs 600 watts (8 ohms) into a normal-sized, 42-pound single chassis per channel.

The previous generation “squared” series improved output-stage performance whereas the newer “cubed” series improves the input stage.

The result represents a more refined sound for Bryston overall.

The Bryston 7B3’s bass extension and stability during demanding musical passages, coupled with relatively low noise, impart an admirable sense of ease to the presentation. Soundstage depth is in keeping with other solid-state amps at its price level, but width and height are really exceptional.
